**YOU SET
THE LIMITS**

Quality production and keeping pace with age of technology are the only keys to survive the competition ever intensifying due to the technological advances. **AKRA** Elevator&Escalator, whose story begins in 1994, hence, set its goals as keeping pace with the age of technology and making quality production also by making use of its advantage: being a young and dynamic brand. Entering the elevator industry in reliance upon its industrial experience and knowledge, our company set off on its journey in Ankara Kahramankazan Industry Zone with German Technology. Believing that the success is a product of keeping pace with ever-evolving technological developments, and customer-focused mindset, our founders also defined the service mindset of **AKRA** Elevator&Escalator in this direction, following a successful track in the elevator industry.

EVERYTHING YOU NEED

We are ready to provide you any kind of engineering, R&D, package elevator and project services thanks to our capacity, as well as experience we built up in elevator, escalator and walkway industry. We are everywhere a city needs.

MASTER OF ELEVATOR

Experienced team, impeccable installation and cutting-edge engineering.

DESIGN

To provide our clients the best service, our engineers and technical team develop the technical details and projects of the order we received and supervise and control the entire production process.

ENGINEERING

The elevator car, suspension, counterweight frame and components are designed in the most ideal elevator dimensions in line with the features and shaft size required by our clients and submitted our clients for their approval.

PRODUCTION

After reviewed and approved by our clients, elevator car project are included in the production schedule set by our engineers and technical team. During the production process of elevator car and components, cutting, bending, punch and laser operations are carried out.

Then, joining process begins where components making up the external body of the elevator car are integrated. Once joining process completed, our engineers and technical team check to see if it conforms to the project specifications.

LOGISTICS

After the final checks, the elevator car, suspension, counterweight frame and components are dismantled and individually packaged for shipping. Packages are labelled with company details, construction site, contents so as to avoid potential confusions. Once packaging and labelling completed, shipping advice is sent to our clients.

INSTALLATION

AKRA Elevator&Escalator provides a complete service which include system installation, assembly and after installation services via its Professional team.

YOU SET THE LIMITS

In the ever-advancing elevator market, elevator users have also become more knowledgeable and accordingly the wants and expectations of them have been increasing every passing day. Therefore, we are enhancing the quality and practical use of our products, developing their designs, and keeping the standards of our services at the ever-higher levels.

PACKAGE ELEVATOR SOLUTIONS

AKRA Elevator&Escalator is managed to keep the customer satisfaction at the highest levels by offering package elevator options to his business partners, on top of the elevator cars and components produced by us.

In this way, we not only engage in elevator sales, but rather, and more importantly offering package elevator options by producing and assembling all elevator components together that will best meet the varying requirements and preferences of our business partners, as well as the buildings which will house our elevators.

Offering a wide range of products, our company manufactures elevator and escalator systems that are equipped with the world-recognized German Technology.
